

Super Press Blanket

A rubber and glass beaded base for flat stamping. Especially good for long runs on cylinders or platens, good for large solid areas as the blanket is slightly permeable allowing the gas to escape so preventing gassing of the foil. Has a memory so it will always go back to its original shape.

- Size:

900mm x 1 linear Meter x 0.60mm (Ref: 872110)

- Main advantage:

Good for large solid areas
