CAPSORB

SUPER ABSORBENT PAD

Nobody dries out like me!

CAPSORB disposable super absorbent pad soaks up great quantities of liquid, making the surface clean and dry quickly.

CAPSORB is practical and safe and its structure is of three layers:

The bottom layer is made of a soft non-woven that, thanks to its special embossed structure, allows to absorb the liquids quickly, even on the most delicate surfaces.

The high absorption core layer catches up and retains liquids, preventing dripping.

The top layer consists of a protective barrier film. The functional fold facilitates the removal and the disposal of the soaked pad, and the barrier film avoids direct contact and any kind of contamination with the absorbed substances and everything happens in total safety.

CAPSORB is available in 2 sizes and absorptions:

Pad 45 x 30 cm, absorbs 1 litre;

Pad 30 x 30 cm, absorbs ½ litre;

Blue bottom layer
thank to its special embossing
allows to absorb
the liquids quickly

Functional fold
to facilitate the pad removal

Printed liquid-proof top film
highest protection and hygiene
