DURAMAT

LONG LIFE SLIP PREVENTION MAT

DURAMAT is the anti-slip absorbent mat designed for the more extreme industrial environments. It is developed to be applied in areas with high traffic of carts and forklifts or next to machine-tools such as cutters and lathes.

DURAMAT offers high resistance and durability. All industrial liquids as oils, hydrocarbons, solvents, lubricants and water are quickly absorbed by the mat, leaving the surfaces dry and safe.

The mat features, the absorbing structure and the elevated mechanical properties make **DURAMAT** a safety device.

DURAMAT helps to prevent the slip accidents that can arise from leaks and spills; it protects the surfaces and reduces the cleaning costs.

FEATURES:

- SAFETY
- HIGH RESISTANCE IN INDUSTRIAL TRAFFIC AREAS
- DURABILITY
- FIRE RESISTANT
- COSTS SAVING

*Without any doubt
the best industrial
absorbent mat!*
